SUMMARY

Software Development Engineer in Test (SDET) with experience in manual, automated, API, and performance testing for applications with complex business workflows, particularly in insurance and transactional systems. Built a **Playwright and TypeScript** automation framework from scratch covering E2E, API, and database validation across 8 partner banks, integrated into **GitHub Actions CI/CD** for pull request smoke tests and on-demand regression. Introduced load testing with **k6** to validate API performance against latency thresholds. Reduced regression testing effort by up to **80%**, with an emphasis on maintainability, reliability, and cross-functional collaboration.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, SQL, HTML5, CSS3, Java, Python
- **Testing Tools:** Playwright, k6, Katalon Studio, Postman, Hoppscotch, Apidog
- **CI/CD & DevOps**: GitHub Actions (parameterized and matrix workflows), Secrets Management
- **Version Control & Collaboration:** Git, GitHub, JIRA, Slack, MS Teams
- **AI Tools:** Claude, Cursor
- **Database:** PostgreSQL, MySQL, SQL Server Management Studio (SSMS), DBeaver
- **Design & Modeling:** Figma, Visual Paradigm

WORK EXPERIENCE

Qoala Indonesia — Jakarta, Indonesia
Junior Software Development Engineer in Test (SDET I) — *Oct 2025 – Present*

- Architected a scalable Playwright + TypeScript framework from scratch using Page Object Model (POM), supporting 8 partner banks across full insurance policy lifecycles, growing to 100+ E2E scenarios with automated premium-rate validation against Excel rate tables, reducing regression testing effort by up to 80%.
- Built GitHub Actions CI/CD pipelines running smoke tests on every pull request, plus on-demand regression parameterized by environment, bank, and flow scope, including full multi-bank matrix runs with secure credential handling.
- Automated an API test suite of 60 test cases covering positive, negative, and edge cases for an external partner policy-issuance API, with database validation and automated reporting of created policies.
- Designed and executed k6 load tests in paced and burst modes with p95 latency thresholds and automated reports, assessing API throughput and stability before release.

PT. Astra International Tbk — Jakarta, Indonesia
Software Quality Assurance (Project-Based Contract) — *Jun 2025 – Sep 2025*

- Executed manual regression testing across 1,000+ scenarios, verifying that system updates did not break existing functionality.
- Developed test data generation scripts using Playwright, eliminating repetitive manual setup and increasing testing efficiency by 20%.
- Identified, reproduced, and validated bug fixes with developers, tracking defects through to resolution in JIRA.

PT. Synapsis Sinergi Digital (Synapsis.id) — Jakarta, Indonesia
Software Quality Assurance Engineer Intern — *Feb 2025 – Jun 2025*

- Designed 1,000+ test cases for client websites and super apps, validating the functionality and reliability of critical user flows.
- Developed an automated regression suite using Playwright, reducing regression testing effort by 40% and enabling faster feature releases.
- Performed API testing with Postman to validate functionality and security, and verified bug fixes with developers before release.

PT. Kalbe Farma Tbk — Jakarta, Indonesia
Quality Assurance Intern — *Feb 2024 – Feb 2025*

- Created test plans, test scenarios, and issue logs, establishing a structured testing process for the team.
- Increased test coverage by 40% across 3 major projects by writing automated test scripts with Playwright and API tests with Postman and Hoppscotch.
- Built a project dashboard to track testing progress, giving the team and managers a live view of project status.

EDUCATION

Bina Nusantara University (Binus) Jakarta, Indonesia
Bachelor of Science in Information Systems Accounting & Auditing *Sep 2021 – Jun 2025*
Thesis: Fjord Phantom Malware Process and Execution Analysis in Mobile Banking Application **(Published)**

- Major GPA : 3.64/4.00
- Relevant Coursework : Information Systems Design, Financial Auditing, IT Governance, Data Analytics, UI/UX Design, System Testing, Web & Application Development.

ADDITIONAL TRAINING

RevoU (Boot Camp) Jakarta, Indonesia
Full-Stack Software Engineer *Oct 2024 – May 2025*
Completed an intensive full-stack bootcamp progressing from HTML/CSS/JavaScript fundamentals to frontend development with React and Next.js, culminating in RESTful API development with Python and Flask. Applied these skills across two capstone projects **KlikMart** and **RevoU Bank**.

PROJECT EXPERIENCE

KlikMart (2025 – Website)

- Developed a responsive e-commerce frontend for mobile and desktop using **Next.js**, **Tailwind CSS**, and **TypeScript**.
- Implemented a dynamic product catalog with advanced search and sorting features, focusing on component reusability and performance optimization.

RevoU Bank (2025 – RESTful API)

- Built a RESTful API with **Python** and **Flask** for core banking features.
- Structured a **PostgreSQL** database to efficiently handle user accounts and transactions.
- Performed API testing with **Postman** to validate endpoint reliability and data integrity.

LaporAja (2023 – UI/UX Design)

- Designed a mobile app concept to bridge citizens and local government for incident reporting.
- Focused on user-centric design principles to ensure accessibility for non-technical users.

CERTIFICATION

- Full Stack Software Engineer – RevoU (2025)
- Memulai Pemrograman Dengan Java – Dicoding Indonesia (Valid until 2027)
