SUMMARY

Software Development Engineer in Test (SDET) with experience in manual and automated testing for applications with complex business workflows, particularly in insurance and transactional systems. Skilled in building automation frameworks from scratch with **Playwright and TypeScript**, and in integrating them into **CI/CD pipelines using GitHub Actions** to give teams faster feedback on every pull request. Reduced regression testing effort by up to **80%** through automated E2E coverage. Focused on E2E, API, and database validation, with an emphasis on maintainability, reliability, and cross-functional collaboration.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, SQL, HTML5, CSS3, Java, Python
- **Testing Tools:** Playwright, Katalon Studio, Postman, Hoppscotch, Apidog
- **CI/CD & DevOps:** GitHub Actions, CI/CD Pipeline, Secrets Management
- **Version Control & Collaboration:** Git, GitHub, JIRA, Slack, MS Teams
- **AI Tools:** Claude, Cursor
- **Database:** PostgreSQL, MySQL, SQL Server Management Studio (SSMS), DBeaver
- **Design & Modeling:** Figma, Visual Paradigm

WORK EXPERIENCE

Qoala Indonesia

Jakarta, Indonesia

Junior Software Development Engineer in Test (SDET I)

Oct 2025 – Present

- Architected a scalable Playwright + TypeScript framework from scratch using Page Object Model (POM), growing it to 100+ E2E scenarios and reducing regression testing effort by ~80%.
- Integrated the Playwright test suite into a GitHub Actions CI/CD pipeline, enabling automated smoke tests on every pull request and on-demand parameterized regression runs with secure credential handling.
- Designed and executed manual test scenarios for critical insurance business flows, covering positive, negative, and edge cases prior to automation.
- Performed API testing with Postman and database validation with DBeaver, documenting and tracking defects through resolution in JIRA.

PT. Astra International Tbk

Jakarta, Indonesia

Software Quality Assurance (Project-Based Contract)

Jun 2025 – Sep 2025

- Executed comprehensive manual regression tests across 1000+ scenarios to ensure system updates did not negatively impact existing functionalities and maintained overall product stability.
- Developed automation scripts for test data generation, eliminating repetitive manual setup and increasing testing efficiency by 20%.
- Collaborated closely with developers to identify, replicate, and validate bug fixes, ensuring effective issue resolution and final product stability.

PT. Synopsis Sinergi Digital (Synopsis.id)

Jakarta, Indonesia

Software Quality Assurance Engineer Intern

Feb 2025 – Jun 2025

- Created over 1,000 detailed test cases for client websites and super apps, to ensure the functionality, performance, and reliability of client websites.
- Reduced regression testing time by 40% by developing and implementing an automated testing suite, which helped the team release new features more quickly.
- Executed comprehensive API tests with Postman to validate functionality and security, ensuring stable and seamless integration between system components.
- Worked closely with developers to test bug fixes, confirming that issues were resolved and ensuring the final product was stable.

PT. Kalbe Farma Tbk,

Jakarta, Indonesia

Quality Assurance Intern

Feb 2024 – Feb 2025

- Created key documents like test plans, scenario tests, and issue logs, which established a clear and organized testing process for the team.
- Improved test coverage by 40% for 3 major projects by writing and running automated tests script using Playwright.
- Validated API functionality and security for key services using Postman and Hoppscotch, preventing potential integration issues and enhancing system reliability.
- Built a project dashboard to track testing progress, giving the team and managers a clear, live view of project status.

EDUCATION

Bina Nusantara University (Binus)

Bachelor of Science in Information Systems Accounting & Auditing

Jakarta, Indonesia

Sep 2021 – Jun 2025

Thesis: Fjord Phantom Malware Process and Execution Analysis in Mobile Banking Application (**Published**)

- Major GPA : 3.64/4.00
- Relevant Coursework : Information Systems Design, Financial Auditing, IT Governance, Data Analytics, UI/UX Design, System Testing, Web & Application Development.

ADDITIONAL TRAINING

RevoU (Boot Camp)

Full-Stack Software Engineer

Jakarta, Indonesia

Oct 2024 – May 2025

Completed an intensive full-stack bootcamp progressing from HTML/CSS/JavaScript fundamentals to frontend development with React and Next.js, culminating in RESTful API development with Python and Flask. Applied these skills across two capstone projects **KlikMart** and **RevoU Bank**.

PROJECT EXPERIENCE

KlikMart (2025 – Website)

- Developed a responsive e-commerce frontend using **Next.js**, **Tailwind CSS**, and **TypeScript**, ensuring a seamless experience across mobile and desktop devices .
- Implemented a dynamic product catalog with advanced search and sorting features, focusing on component reusability and performance optimization.

RevoU Bank (2025 – RESTful API)

- Designed a secure and scalable server-side architecture using **Python** and **Flask** to manage core banking functionalities.
- Structured a **PostgreSQL** database to efficiently handle user accounts and transactions.
- Executed extensive API testing using **Postman** to validate endpoint reliability and data integrity.

LaporAja (2023 – UI/UX Design)

- Designed a mobile app concept to bridge citizens and local government for incident reporting.
- Focused on user-centric design principles to ensure accessibility for non-technical users.

CERTIFICATION

- [Memulai Pemrograman Dengan Java – Dicoding Indonesia](#) (2024 – 2027)
- [Full Stack Software Engineer – RevoU](#)
